Closing remarks

- ✓ There was a major bug in the Membership web interface due to software version changes, which prevented proper submission of New Member applications for a couple of months. THANK YOU, NATHAN and RAFFAELLA, for fixing it. And many thanks to all the applicants who waited patiently for the problem to be fixed and helped with testing.
- ✓ If I missed any new applicants due to this, please let me know by end of the next week, and I'll put them in Probation.
- ✓ A major cleanup of the Membership DB is necessary – please help me by verifying that all your information is correctly included:
  - ✓ Please make sure you have entered your FIRST NAME (!), last name, institution, author name, ORCID in the Membership DB.
  - ✓ Please verify if you selected the appropriate WG in the Membership DB.
- ✓ **Please help your students filling their applications!**
- ✓ IRs: if you have new PhD students or postdocs and wish for them to start Probation, there is no need for you to send me an email beforehand, just have them submit the online application on the membership DB.
- ✓ **IRs: Please make sure to attend the Membership Meeting if your student is on Probation and is going to be evaluated to become Term Member.**

No representation = no transition to Term
