Deep Processes
Toward a Physics Vision for CEBAF 2037

Preparation

- Initial discussion at the DPWG meeting on November 5
- Initial WG input collected through a short form, followed by contributions from volunteers
- Today's short pitches reflect several proposed directions, not an exhaustive list

Goals for today

- Identify compelling scientific questions and opportunities for the next decade and beyond
- Discuss CEBAF's distinctive role, including complementarity with the EIC
- Begin identifying coherent picture of capabilities needed to pursue these opportunities

Format

- Short scientific pitches followed by an open discussion
- No ranking or prioritization of individual contributions today
- Input will help shape the broader CEBAF 2037 community planning process
