

Exclusive Photoproduction Measurement of $K^+\Sigma^-$ off Quasi-free neutrons from Deuteron

- P.I.: Haiyun Lu
- Committee: Nicholas Zachariou, Douglas MacGregor, Michael Dagger
- First round was (re-)initiated on July 6th 2015 with comments submitted to author on July 23rd
 - Reply from author was received on January 29 2016.
 - Document has now been improved significantly and second round of comments is underway.
- Second round of comments to be submitted next week

We still observe long delay in the reply of comments, however we note that the author had to address some visa-related problems that set back his work schedule. We hope that the next round will go significantly faster and conclude the review.
