

g8b (η/η' / ω beam asymmetries) review analysis status: **Resurrected!**

- Summary
 - Title: Data analysis technique for obtaining $\gamma p \rightarrow p \eta/\eta'$ / ω beam asymmetries from g8b
 - Review started on Jan 3, 2013
 - First round comments: Feb 6, 2013
 - Comparison between the moments methods and phi-bin methods (The committee asked for examples of the latter)
 - Clarification on some systematic uncertainties
 - Some recocking was needed ...
 - Response received! : Feb 17, 2016
 - Committee yet to meet; The process should conclude very soon!
