Deep Processes

Session | **Location:** CEBAF Center, A110 | **Convener:** Keith Griffioen

8:30 – 8:50 AM **Update on status of DVCS analysis from E1-6 data**

Speaker
Dr Aram Movsisyan

8:50 – 9:10 AM **The PARTONS platform: status and prospects**

Speaker
Herve Moutarde

9:10 – 9:30 AM
Beam-Spin Asymmetry for back-to-back di-hadron electroproduction with CLAS6 and CLAS12

Speaker
Dr Silvia Pisano

9:30 – 9:50 AM **SIDIS dihadron asymmetries from the eg1-dvcs experiment**

Speaker
Sergio Anefalos Pereira

9:50 – 10:10 AM **CLAS12 beamline background studies and a new shielding design**

Speaker
David Riser

10:10 – 10:30 AM **Low energy DVCS studies with CLAS12**

Speaker
Latifa Elouadrhiri

10:30 – 11:00 AM **Coffee Break**

11:00 – 11:20 AM **Helicity amplitude formulation of hard exclusive processes**

Speaker
Prof. simonetta liuti

11:20 AM – 12:00 PM **Discussion of the ND3 run group extension proposal**

Speaker
Silvia Niccolai

12:10 PM
