

# **Hadronic Physics with Lepton and Hadron Beams**

**Tuesday, September 5, 2017 - Friday, September 8, 2017**

**CEBAF Center**

## **Scientific Program**

The topics covered in the workshop will include:

meson and baryon spectroscopy;

the quark and gluon structure of hadrons and nuclei;

the properties of hadrons in the nuclear medium.

The workshop will consist of 4 days of morning and afternoon plenary talks, focusing on the opportunities and challenges for hadronic structure and spectroscopy studies at these and other modern accelerator facilities.
