

# Light Cone 2018

## Friday 18 May 2018

### I - Auditorium (08:30-10:10)

-Conveners: Tobias Frederico

time	[id] title	presenter
08:30	[94] Spatial distribution of Jaffe-Manohar and Ji's angular momenta	Dr LORCE, Cedric
08:55	[33] GPDs and LFWFs : crossing the $ x  =  x_i $ line	Dr MEZRAG, Cédric
09:20	[96] Lorentz invariance and QCD equation of motion relations for partonic orbital angular momentum	RAJAN, Abha
09:45	[97] GPD phenomenology	FREESE, Adam

### I (10:40-12:20)

time	[id] title	presenter
10:40	[98] The GPD program at Jefferson Lab	ELOUADRHIRI, Latifa
11:05	[99] Virtual Compton scattering on a scalar target: the need for a complete set of Compton form factors	BAKKER, B.
11:30	[100] Nucleon structure in a light-front quark-diquark model	Mr MAJI, Tanmay
11:55	[101] Recent results and prospects for hadronic physics at Belle and Belle II	Dr VOSSEN, Anselm
