

# Closing Final Remarks

Kyungseon Joo  
University of Connecticut

April 28-29, 2020

# Closing Remarks

---

- Much more than 100 people registered, and more than 90 people stay connected most of time.
- Our collaboration is very active, and activities are very strong.

# Data Processing

---

- RG-A Pass1 data processing will be completed soon.
- RG-B/RG-K pass1 readiness review will be conducted soon.
- RG-A efforts to “First Publication” are making a good progress.

# Task Force Efforts

---

- Various task force efforts are currently underway:
  - Forward tracking
  - Central tracking
  - Detection efficiency and background merging
  - Others...
- Active collaboration participation is a key for success and is encouraged to join the discussion and efforts.

# PAC48 Preparation

---

- PAC48 New proposal preparation and internal collaboration review
- PAC48 Jeopardy review preparation and internal collaboration review

# Data Mining

---

- A lot of data mining efforts with CLAS6 data are underway for excellent publications.
- This effort is very important for the collaboration and the community and should continue.

# Next Collaboration Meeting

---

- Send us your opinion about future collaboration meetings during Corona virus era such as frequency, format, etc.

# Summary

---

We are all facing a difficult time. Let's work together as one collaboration and support each other.
