

19th HPS Collaboration Meeting
Jefferson Lab (remote)
November 18-20, 2020

https://www.jlab.org/conference/HPS_NOV2020

Conference Date

November 18, 2020 to November 20, 2020

Conference Location

Remote Meeting

The Heavy Photon Search Experiment (HPS) at Jefferson Lab has just successfully defended its remaining beamtime at the PAC48 jeopardy hearing. The PAC endorsed the HPS run plan and recommended maintaining the remaining time allocation (135 days) as well as the experiment grade A. In addition to presenting our run plan, our PAC presentation included HPS progress in three key areas, which will be the main focus of this collaboration meeting.

During a 3-day remote collaboration meeting, we will discuss completing the analysis and publishing the results from our 2016 engineering run, the status of calibration and alignment of the 2019 data, and ongoing preparations for the 2021 summer run. As in every meeting, we will hear updates from JLAB and Hall-B. We'll also hear an overview of recent developments in Hidden Sector Physics and possible new physics targets. The business session of the meeting includes updates from PPC, EC, and the results of the election for a new collaboration and PPC members.

The meeting will provide an excellent introduction to HPS for potential new collaborators, who are welcome to attend.

Bluejeans Meeting ID: 779 297 052

Few remarks

- All talks will be on *indico* (please upload slides before your talk)
<https://www.jlab.org/indico/event/411/>
- Total of 39 (Nov.18, 8:30 am) registered participants
- Each day of the meeting is split into two sessions – 11 am to 1 pm and 1:30 pm to 3 pm (EST), with one coffee break
- The election results will be present at the end of the last day's business session
