

PyHEP 2021 (virtual) workshop

❑ The PyHEP, “Python in HEP”, series of workshops are up again!

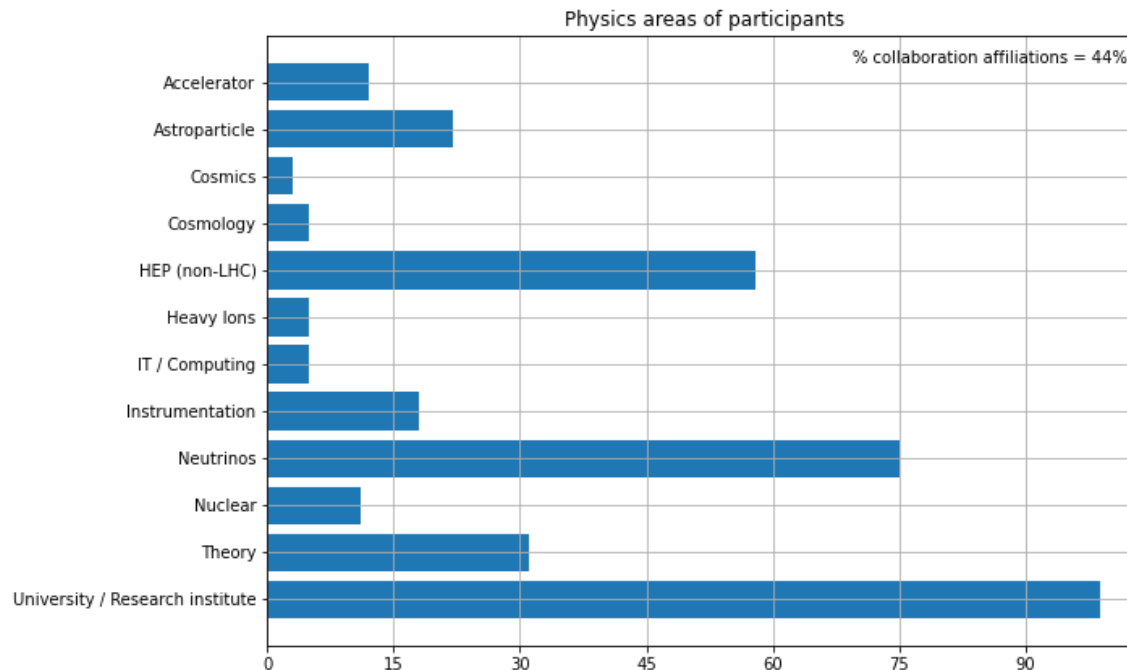

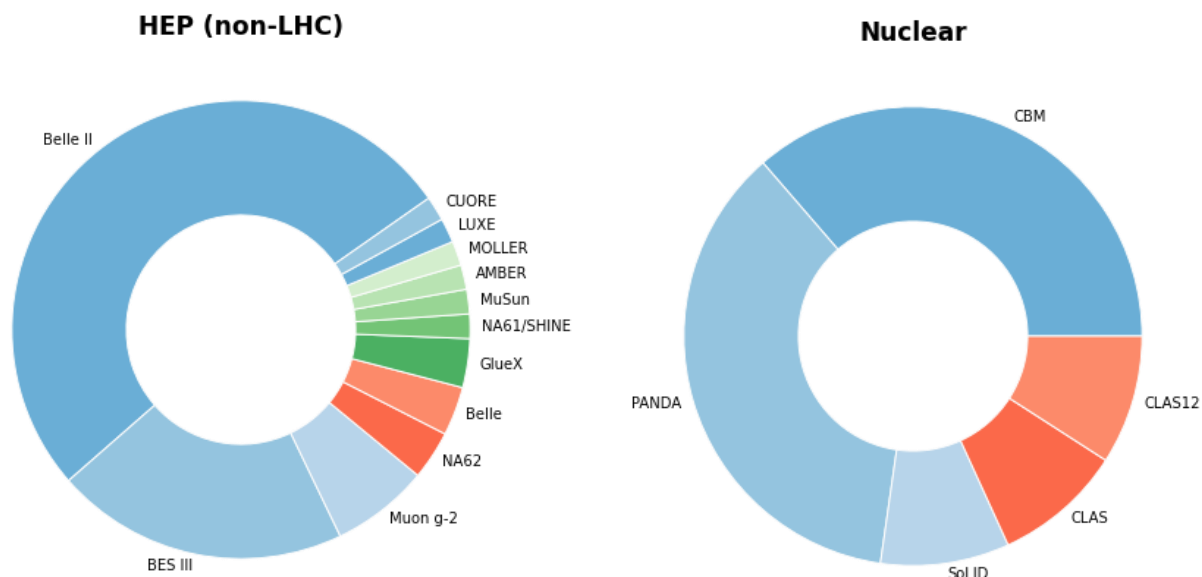

❑ **PyHEP 2021 taking place in July 5-9**

- Extremely pleasant to see many communities represented (56% / 44% from LHC / outside LHC)
- Will you be representing the Nuclear Physics community ...?
- Again very popular, with just over 750 people registered so far

❑ **Call for abstracts still open 😊**

- We have 1 h tutorials, 20+10 min “notebook presentations”, and also welcome very short 10-ish minute presentations “here’s this cool package/method ...” type of talk

❑ **JLab and BNL already participating:**
