

# Hall C Outlook

Cynthia Keppel  
Thomas Jefferson National Accelerator Facility

Hall C Collaboration Meeting  
*January 28, 2021*

# Scheduling in the nearish term

- A new NPES schedule is underway to go up to 12/2022
- Uncertainties in budgets, run weeks, approvals and bears oh my... here's a general approach:
  - Complete high impact running, 2 (4) experiments
  - Try to get as much synergistic science in as possible, *i.e. shared configuration*
  - Try to provide data for variety of groups/interests/topics
  - 2023 (and beyond!) more open, could start NPS or LAD or continue standard configuration

See talk this afternoon!

May – [December?] 2022

Add in  $x > 1$ , EMC, CaFe, NucR

Combine earlier?  
Some challenges to  
make target common

2023 –  
Advice?  
Be ready!

August – December 2021,  
Low base energy –  
facilitates L/T separations

Pion form factor and scaling  
combined experiment

Prepare for  
discussion!
