

# A life with CLAS: the early days

9/'97-10/'98  
Masters

Optimization of the **eg1** polarized target

1/'99-2/'03  
PhD

THE GEORGE  
WASHINGTON  
UNIVERSITY  
WASHINGTON DC

Three-body photodisintegration of  $^3\text{He}$   
(g3 experiment), PRC

3/'03-9/'03

10/'03-9/'06  
Post-Doc

Pentaquark search in  $\gamma d \rightarrow \Lambda \Theta^+$  (g10 dataset), PRL

**Nucleon structure: GPDs**  $\rightarrow$  DVCS, e1dvcs run and analysis  
Co-spokesperson of **eg1dvcs** (DVCS with polarized target)  
(+ a short stint with the Hall C G0 experiment)

# Senior years: from CLAS to CLAS12

From 2006: staff scientist (→ research director) at IPN Orsay (now IJCLab)

**e1dvcs** analyses:  $ep \rightarrow ep\pi^0$  (PRL, PRC), DVCS cross section (PRL)

**eg1dvcs** run, RC & DVCS analysis coordinator (PRL, PRD)

**Central Neutron Detector** for CLAS12 (2 NIM and a detector 😊❤️)

Contact person for **nDVCS@CLAS12** (A, HI)

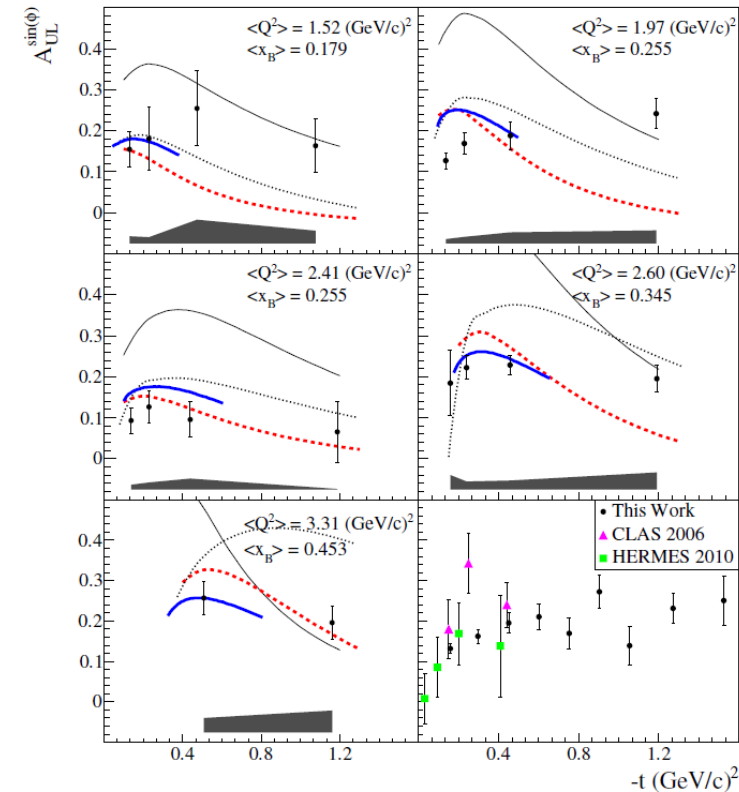

Contact person for **nDVCS with longitudinally polarized target**

**RGB** leader and analysis coordinator

**TCS** analysis (imminent PRL)

Chair of the **Service Work Committee** since 2012

Supervised several PhDs and post-docs on CLAS/CLAS12

## Current responsibilities outside of CLAS:

JLab group leader in France (IN2P3)

Member of the Nuclear Physics Board of the EPS

Member of the LHCC (LHC experiments committee)

Coordinator of EU WP: GPD-ACT (STRONG2020)

Mother of 11-year old twins

No teaching duties

# What I can do for the CLAS Collaboration

Long-standing **experience of CLAS** (detector development, running experiments, data analysis)

Worked on physics subjects covering the **3 Working Groups**

Deep knowledge of the **Collaboration** and its member **Institutions** (thanks to SWC)

Experience in **leading teams** and in international **committees**

Hard working, hands-on, not afraid to speak 😊

Some specific points I'd like to work on:

- **Speed up analysis → publication process:**
  - ✓ Sharing of analysis tools to avoid duplicate work
  - ✓ Standardisation of data-analysis methods, whenever possible
  - ✓ Improve the analysis/paper review process, still slow and not uniform
  - ✓ Frequent interaction with WG leaders and software group
- Interaction with SWC to attribute tasks based on needs and capabilities (Task List)
- Be efficient and available: quick replies, open to new ideas
- Resume in-person Collaboration meetings and bring good wine for the reception 😊

It is an exciting phase for CLAS12: the first data are being published, new experiments are in preparation. It is also a delicate transition phase for JLab and our physics, with the perspective of the EIC on one side and the possible high-luminosity/high-energy upgrades for CLAS12.

Ensuring a successful scientific production for CLAS12 in these years is a necessary condition for the future of CLAS12 and JLab in the longer term.

I am very humbled and honored to be nominated, and I would be delighted to guide the Collaboration during this phase. I look forward to giving it all I can.
