Membership Eligibility

Background:

Term Membership only open to PhD students

Charter states “graduate students”

Question:

Do we allow Masters students to pursue Term Membership based on provision of Service Work?

Some (very) initial thoughts:

- Significant change, in interpretation, for the Collaboration
 - Input of Collaborators sought. If generally positive, we may go for a vote in the fall
- Some do make (have made) important contributions
 - Without recognition (visibility, publications...)
- Some do gain a Masters thesis based on CLAS data
 - Benefitting from data with no official (extra) service/shift contribution is contrary to Collaboration buy-in
