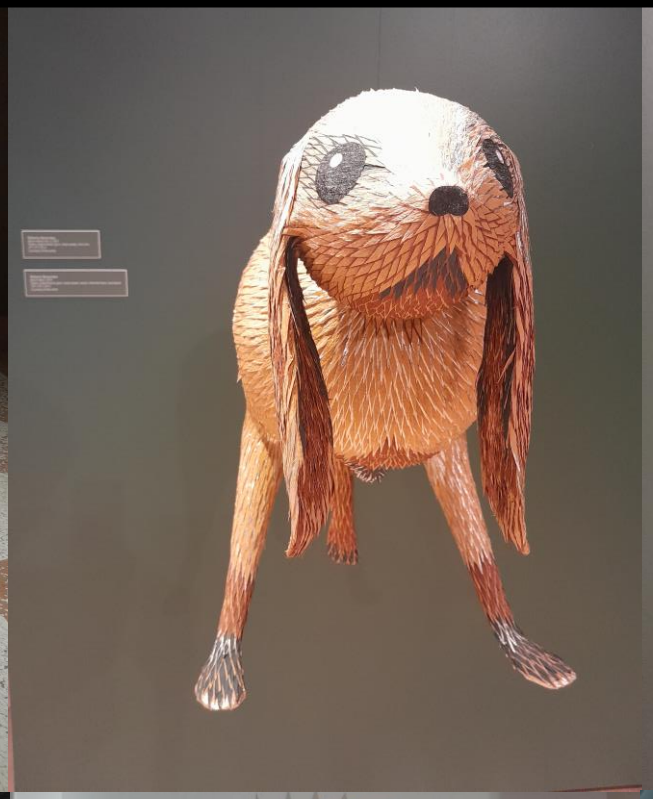
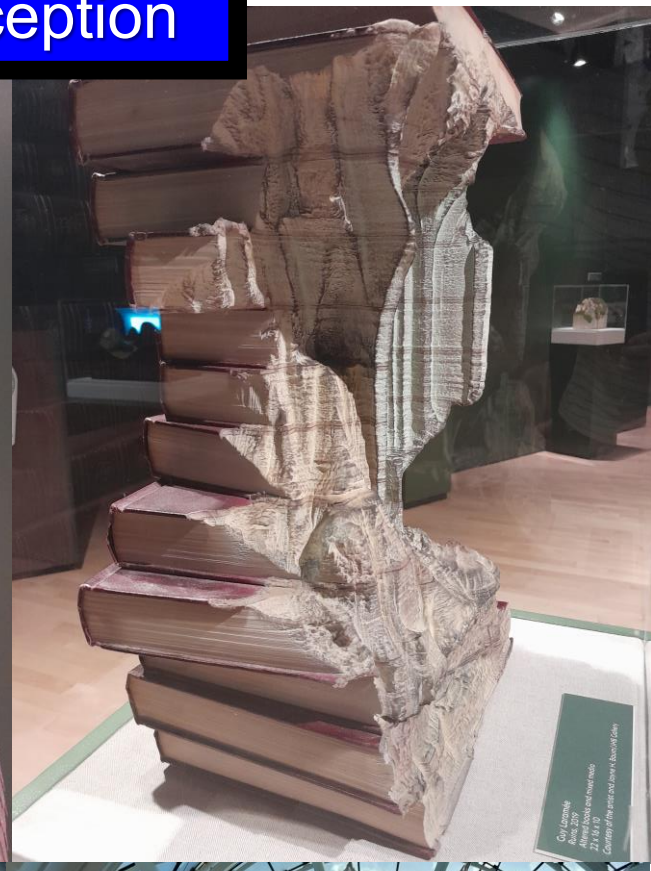
WELCOME BACK TO CNU … Enriching Cultural Perception





Why we are Here: Limited Resources

that is: restricted amounts of inputs required by the Collaboration,

such as permanent and termed positions, graduate students,

grants as well as other sources of funding,

software maturity and usability,

expert knowledge, training, experience …

and time.

How to Manage Limited Resources

- Identify and prioritize the needs
- Compromise on less important issues
- Cooperate on common tasks with common tools
- Improve resource allocation
- Improve documentation, standardization, communication

How to Manage Limited Resources

- Identify and prioritize the needs
  momentum resolution, PID purity, Monte Carlo vs. data matching, statistics, systematics, … ?
- Compromise on less important wants
  perfection, full acceptance, kinematic cuts, vertex resolution, … ?
- Cooperate on common tasks with common tools
  please help make the repository of common methods a success
- Improve resource allocation
  while (small) University groups have little room to maneuver, larger organizations do have possibilities …
- Improve documentation, standardization, communication
  while this is a no-brainer, the wheel still gets reinvented, but I heard promises that modern software tools might help …

So Long, and Thanks for All the Fish
