

Hall C outlook

- Next run period expected to be 24 weeks
 - Run LAD and R-SIDIS
 - Had to move Pion CT experiment another run period
- Near term future running
 - Following run periods standard HMS/SHMS with non-standard beam energies (198 PAC days)
 - Hypernuclear experiments (149 PAC days)
- Long term future (no particular order)
 - Polarized deuteron target experiments (85 PAC days)
 - NPS Calo experiments (Hall A + WACS 53 PAC days), (CPS/Pol tar/WACS 46 PAC days)
 - Strange Form Factor (45 PAC days)
 - SBS SIDIS polarized ^3He and TDIS.
