

**Session Program**

**Sep 4 - 5, 2025**

**Secondary Beams at Jefferson Lab Workshop  
(BDX & Beyond)**

***Thursday Afternoon I***

Jefferson Lab, F113

# Thu, September 4

2:00 PM

## Thursday Afternoon I

**Session** | **Location:** Jefferson Lab, F113 | **Convener:** Mariangela Bondi

|                |                                                                                            |
|----------------|--------------------------------------------------------------------------------------------|
| 14:00 - 14:25  | <b>Directional muon beams using Laser Plasma Acceleration at the BELLA Center (remote)</b> |
| <b>Speaker</b> | Davide Terzani                                                                             |
| 14:25 - 14:50  | <b>tbd</b>                                                                                 |
| <b>Speaker</b> | Claudio Montanari                                                                          |
| 14:50 - 15:15  | <b>FAMU and beyond: muonic atoms in fundamental and applied physics</b>                    |
| <b>Speaker</b> | Riccardo Rossini                                                                           |
| 15:15 - 15:30  | <b>Precision physics with low-energy muons (tbc)</b>                                       |
| <b>Speaker</b> | Adrian Signer                                                                              |

3:30 PM
